

Erasmus+ CBHE Project CHAIN – 101082963

## Cooperation for Holistic Agriculture Innovation Nests in Sub-Saharan Africa

# Modern Teaching in Africa: More Than Just Conveying Knowledge

**Monday 18.11.2024 10-12 CET and Monday 09.12.2024 10-12 CET**

Education is the key to Africa's development. But to reach its full potential, teaching must change. Traditional teaching methods, based on hierarchies and passive learning, hinder the development of individual talents. Modern teaching, on the other hand, promotes the active participation of all learners, breaks down hierarchies and creates space for creativity and innovation. Through projects, competitions and individual support, teachers can discover and promote the strengths of their students. If we succeed in creating an environment in which everyone can have their say and contribute their ideas, we will produce a new generation of leaders who will lead Africa into a successful future.

Let us work together to revolutionize education in Africa!

### Call:

**Visual design:** Create an attractive poster or graphic that visually represents the three most important bullet points.

**Clear and concise language:** Formulate the bullet points so that they are easy to understand and memorable.

**Call to action:** draw and write down the bullet points and send them by email to [bernd.mueller@hswt.de](mailto:bernd.mueller@hswt.de) and [tobias.greissing@hswt.de](mailto:tobias.greissing@hswt.de) by November 15th.!!!!

Information: Name / Country /date / University

**Co-funded by  
the European Union**

Contact:  
Dr. Bernd Müller  
Weihenstephan-Triesdorf University of Applied Sciences
